#### NOTE

Note for Different Data

Those are the standard data values written on the microprocessor. Therefore, the data values of the modes are stored respectively in the memory.

In case of a device replacement, adjustment by rewriting the data value is necessary for some items

- 50 ..... 50 Hz data
- 60 ..... 60 Hz data
- Note for Different Data listed on the adjustment item table are reference values, therefore it is different for every model.

In case some items are not well-adjusted, give them fine adjustment.

Write the data per each item number ( $\boxed{MUTING} + \boxed{0}$ ).

- Select item numbers "3E" (OP0), "3F" (OP1) and "40" (OP2) and respectively set the bit per model with command buttons

### NOTE

• Note for Different Data Those are the standard data values written on the microprocessor. Therefore, the data values of the modes are stored respectively in the memory.

In case of a device replacement, adjustment by rewriting the data value is necessary for some items.

- 50 ..... 50 Hz data
- 60 ..... 60 Hz data
- · Note for Different Data listed on the adjustment item table are reference values, therefore it is different for every model.
